 - **Platforms & CMS:** WordPress, Strapi, Shopify, Lightspeed
 - **Design & Prototyping:** Figma, Photoshop, Illustrator, InDesign, UI/UX Design
 - **Project Management:** Jira, Confluence, ClickUp
-

WORK EXPERIENCE

Full Stack Developer | *Part-Time, Migraine Heroes* | *Remote* March 2026 – Present

- Optimized a React Native calendar feature using client-side caching and data prefetching, cutting screen loading latency by 50% and reducing API calls.
- Fixed critical layout and UI glitches on Android to ensure visual consistency across both iOS and Android apps.
- Cleaned up analytics data by filtering out internal test accounts, restoring accurate reporting for the business team.
- Improved admin dashboard performance and UX in Next.js by building reusable components and adding smooth loading states to bridge network delays.
- Partnered directly with the CTO to guide frontend development and align technical execution with the product roadmap.

Software Developer | *Full-Time, iVenuto.com Corporation* | *Ontario, Canada* October 2025 – Present

- Built a cross-platform visitor management system, connecting a mobile app, Next.js web dashboard, and NestJS backend servers.
- Cut AI API costs by 75% by restructuring prompt logic and fine-tuning the automated AI agent workflows.
- Designed the system architecture for real-time Livekit voice/video agents, making the codebase modular to speed up features for the dev team.

- Handled the full end-to-end UI/UX implementation for mobile and web, creating a simple check-in/out flow for users.
- Worked in an Agile/Scrum team, shipping code in fast sprint cycles to move the product from concept to production.

Web Developer | *Full-Time, Music City Canada* | *Ontario, Canada*

July 2024 – October 2025

- Built an automated inventory sync tool between Shopify and Lightspeed Retail APIs, cutting manual sync times by 95% and boosting SEO web traffic by 15%.
- Wrote automated scripts to import and normalize supplier product catalogs, eliminating over 80% of manual data entry.
- Audited internal plugins and SaaS tooling, cutting monthly software infrastructure costs by 15%.
- Collaborated with marketing and operations teams to build custom internal tools that streamlined cross-departmental tasks.

Full Stack Developer | Tech Lead | *Full-Time, Theoria Medical* | *Michigan, USA*

Jun 2020 – Apr 2024

- Led the technical design and development of an enterprise learning management platform, speeding up client and employee onboarding by 30%.
- Mentored a small team of developers, established clean code standards, and implemented code reviews that cut deployment bugs by 20%.
- Maintained strict HIPAA compliance across all development cycles, implementing database encryption and data access auditing.
- Worked with UI/UX designers to deliver high-performance, responsive web views, increasing platform user satisfaction scores by 15%.

Web Developer | *Full-Time, Referral Engine* | *North Wollongong, Australia*

Dec 2016 – Jun 2020

- Developed custom, responsive web pages, working directly with business clients to map out feature requirements.
- Managed the full project lifecycle for multiple client websites, maintaining a 100% on-time project completion rate and a 95% satisfaction score.
- Created interface layouts and mockups that accelerated client sign-offs and project approvals by 20%.

EDUCATION

- **Diploma in Web Development and Internet Applications** **2024**
Fanshawe College | London, Ontario
- **Bachelor of Fine Arts Major in Advertising** **2014**
Far Eastern University | Manila, Philippines

RECOGNITION

- President's Honour Roll at Fanshawe College
- Finished Top of Class in Zuiitt Coding Bootcamp
- Top 1 for all 3 Milestone Projects at Zuiitt Coding Bootcamp
